WARRANTY

These garments are guaranteed for one year against defects in workmanship and materials

CHOKO DESIGN's snowmobile suits have evolved to a performance level of excellence appreciated by quality conscious snowmobilers. We strive constantly for excitement in design and excellence in performance. We have earned a reputation as an industry leader, we intend to keep it.

Unsurpassed quality of materials and our innovative construction techniques based on varying fabrics have enabled us to develop a high-tech garment that will create a barrier of thermal protection against the elements, while insuring the ultimate blend of comfort and function.

CDI International Inc. - Choko Design

In order to guide you in the selection of the best Choko Design garments and accessories for your needs we have established a rating system.

The scale depicts our warmest garments and accessories with a descending scale.

10+ being our warmest. More active people should opt for a vented jacket.

**Prices, specifications and materials may change without notice.*

- Designed to keep you mobile and afloat, not weighed down in the event of an unforeseen water emergency.
- Floataid Technology helps with initial Cold-Water Shock; Cold-Water Shock is a real danger in water below 15°C (59°F). If you do find yourself in the water, Floataid can save your life.
- Multi-Layer membranes create internal air pockets for additional buoyancy.
- Bottom mesh self-drainage system for quick water evacuation allowing for lighter weight when exiting water as well as quicker return to body warmth.
- Floataid's insulation technology aids with body warmth even when wet.

To achieve the maximum floatation time intended by the Choko Design Floataid technology you must combine both the Floataid jacket and pants.

Choko Design's Floataid technology is not approved as a flotation device nor is it Coast Guard approved. Please respect your surroundings and ride cautiously over ice.
